Hi Janette,

I remember it as you do, that the incinerator was farther north on 8801 and the map showing that was in the RFA. I will check next week when I can get my hands on the RFA again and check that is accurate and send you detail.

Tasya

Subject: location of former incinerator on 8801 site

Hi Tasya. I'm trying to verify the location of the former incinerator that was located at the 8801 property north of FRP. The D&M 1986 report shows it north of DM-3A/3B, as does the agency draft CMS work plan. But I vaguely remember seeing somewhere that it might have been located further up the shore on 8801, but I can't seem to find that again. There is some dioxin/furan soil contamination in that area which supposedly will be excavated (Area 4 – see map below). Do you have any 8801 documents that Ecology doesn't have on the site webpage, which might show the incinerator location? Could you look in your copy of the RFA and see what that shows re: location of incinerator?

Unfortunately I'm not finding that any samples were analyzed for D/F in that area of the incinerator just north of the property line. Some of that area is supposed to be excavated anyway (Area 3).
